Chalamala's Tale

Team:

- Dominic, Kronig, dominic.kronig@students.unibe.ch
- Marta, Visetti, marta.visetti@unifr.ch
- Nichanth Nagalingam, nichanth.nagalingam@unifr.ch

1. Introduction

- The theme of the game

Based on and themed after Fribourg folklore; time travels and will to go back home

- A short description of the idea

After being thrown back in time to medieval folklore Fribourg, defeat enemies and help kind strangers to return to the present

2. Tetrad

- Mechanics

Room based combat & progression.

Maybe: Randomize the order of rooms. For each room, have designated "random" options/spots where enemies and NPC's can spawn for better gameplay and replayability.

Actions: move around, attack, talk with characters, take improvements and tokens

- Aesthetics (graphics + sound)

<u>Graphics:</u> Medieval Fribourg, ancient looking graphics and nature. Characters drawn as in a fairytale book

<u>Sound:</u> mostly background music (inspired by the Ranz des vaches?) ; tense during fights otherwise relaxed music in the exploration rooms.

- History

The player must navigate, help people and become stronger to defeat the Gotéron Dragon at the end

1. <u>Getting into old Fribourg</u>: You are going on a trip to visit Fribourg but suddenly the train on which you sit transforms into a horse and all the things around you are suddenly going back to their state of medieval times. In short, you have traveled back in time and would like to go back to your era. Chalamala talking and telling the story.
2. <u>Discover how you ended up there</u>: talking with locals of the time you discover that there is a religious sect that wanted to have more adepts like back in the days, but had some technical problems in doing so and ended up creating a time bubble
3. <u>Try to return to your timeline</u>: to do so you must fight the bad guys of Fribourg folklore that took the side of the sect (if you die you might end up stuck in ancient time forever... or retry)

- Technology

PC with keyboard and mouse

3. Planning

06.03.2026: project idea presentation

13.03.2026: development of room navigation and fight behaviors

20.03.2026: first actual fight (lives, attacks, defense, ...)

27.03.2026: story telling (“introductive trailer”)

03.04.2026: structure of the game improvement (graph connecting which fight unlocks which ability, how to advance in the game); sort of mind map/progression overview

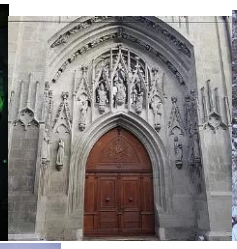
10.04.2026: main character: from block to actual moving sprite

17.04.2026: death menu: respawn mechanics

24.04.2026: other characters and backgrounds characterization

May: finish the game

4. Moodboard and references



"good"		"Evil"	
characters	story	characters	story
Hercule-le-hardi	Golden Age	cathiau (witch)	Apparition (Bulle)
Cholamola	Bull cult	Everdes Lord	Moon-eating horse?
Ogan de la Dolyàta	"ranz des vaches"	Géant	
Géant		red horne goat	
tregvant Saint		Gottéron Dragon	

Fribourg’s medieval folklore and architecture; Binding of Isaac room dynamics; storytelling and interaction with mythological creatures
